RECOVERY AND EXPORT: Flexible with Unlimited Retention at No Additional Cost

- Unlimited point-in-time restore with historical snapshots/versions.
- "Super" granular, object-level restore of metadata by type with precise control.
- Granular restore of data by record,
- Salesforce Data Anomaly Detection and notification about activity red flags that could indicate problems such as potential data loss or atypical changes.
- Sandbox Seeding with Data Anonymization: Test applications or processes by replicating all or a part of production data and metadata. Saves time, effort, and eases testing. Seeding includes 1-click customizable data anonymization.
- Compare data/metadata across backups and/or production data: Display only changed data, to pin-point the exact data that was altered.
- Advanced search capabilities for real-world scenarios such as by RecordID, metadata object types, and last modified user

SECURITY: Stringent and Audit-ready Credentials

- Secure Amazon S3 data storage for high availability during Salesforce downtime.
- ISO 27001, HIPAA, and GDPR compliant.
- OAuth, OpenID, MFA/2FA, Okta and IP restriction support.
- Choice of 10 global AWS data centers in Australia, Canada, France, Germany, India, Ireland, Japan, South Africa, the U.K., and the U.S.
- AES-256 data encryption at rest and HTTPS in-transit.
- Sandbox seeding with 1-click data anonymization to secure PII data and comply with regulations.
- Immutable Storage-Object-Lock (optional) for ransomware recovery.
- 7-day recovery grace period for deleted backups.
- 99.9% uptime / availability SLA.
- Fine-grained access control for multiple admins.

PRODUCTIVITY: Low TCO, High ROI

- Single dashboard for backup of all your SaaS platforms (Microsoft 365, Google Workspace, Salesforce, Box, and Dropbox).
- Dedicated Customer Support Hub with tutorial videos.
- Out-the-box setup, no-training intuitive UI and zero maintenance effort.
- Flexible pay-as-you-go/use monthly and annual pricing model. Pay via the mode of your choice: invoiced bank transfers or recurring credit card payments.
- Scale easily with dynamic auto-addition of licenses.
- Flexible integration with extended ecosystem including Splunk SIEM, Autotask, and Backup Radar and accessible API.
- Auto-archive licenses for seamless on/off-boarding.
- Daily backup summary report. Exception email alerts with inline troubleshooting links.
- Filterable audit and activity log with drill-down view of all exports, restores, and backups.
