Get AI-ready for Microsoft Copilot

What is Microsoft Copilot for M365?

Microsoft Copilot for M365 is your AI-powered companion embedded into the Microsoft 365 apps you use every day, designed to help you unleash creativity and up-level skills.

Copilot combines the power of large language models (LLMs) with your data to turn word prompts into the most powerful productivity tool on the planet.

Large Language Models + Your Data + Microsoft 365 Apps

How can customers use Copilot?

"Copilot, summarize to-do's from this email."

Draft and schedule emails, summarize long conversations, or let Copilot manage your communications when preparing for events.

"Copilot, add a relevant image to this slide."

Create a draft presentation with a topic prompt, summarize key points, restructure slides, or let Copilot redesign with your business branding.

"Copilot, make this document more concise."

Build on a document or let Copilot write the first draft, organize thoughts, restructure sections, or enhance it with more detail.

"Copilot, generate a formula suggestion."

Identify insights, analyze data and trends, highlight and filter key data points, or let Copilot handle complex calculations for you.

"Copilot, list the main items discussed so far."

Summarize key discussion points, generate transcripts, find buried information or links, or let Copilot send notifications on your behalf.

Who is eligible?

Customers with Office 365 E3 and E5 licenses are eligible to purchase Copilot for $30 per seat through OpenText.

Are they AI-ready?

Are your customers ready for Copilot? Assess their journey using the four pillars of AI-readiness:

1. **Culture**
   Are they curious about how AI can improve outcomes?
2. **Strategy**
   Do they know how they will use AI tools for productivity?
3. **Principles**
   Do they know how to ensure the use of ethical AI practices?
4. **Empowerment**
   Who will help support their journey to AI readiness?

How to prepare customers for Microsoft Copilot

1. **Review licensing**
   Ensure customers are eligible for Copilot.
2. **Assess AI-readiness**
   Gather details on how they will use Copilot.
3. **Assess data and security**
   Review data availability and security posture.
4. **Leverage OpenText**
   Lean on OpenText's AI and Copilot knowledge.

OpenText + Microsoft 365: An unbeatable combination

OpenText is an indirect cloud service provider recognized by Microsoft for operational excellence. We work closely with organizations with yours to help you advance and grow your business. We know navigating the Microsoft world on your own can be complex, especially with the introduction of evolving technologies like AI. That's why we're here to help you assess and implement Copilot for your customers while supporting your journey to sustainable growth.
