- No multi-year lock-ins. Opt-out anytime.
- Low TCO with built-in AWS storage, no-training UI, no-charge recoveries with unlimited retention.
- Tier-1 365x24x7 multi-channel human support.

Why Backup Salesforce

SAAS DATA LOSS IS PREVALENT & DAMAGING

81% of companies lost SaaS data

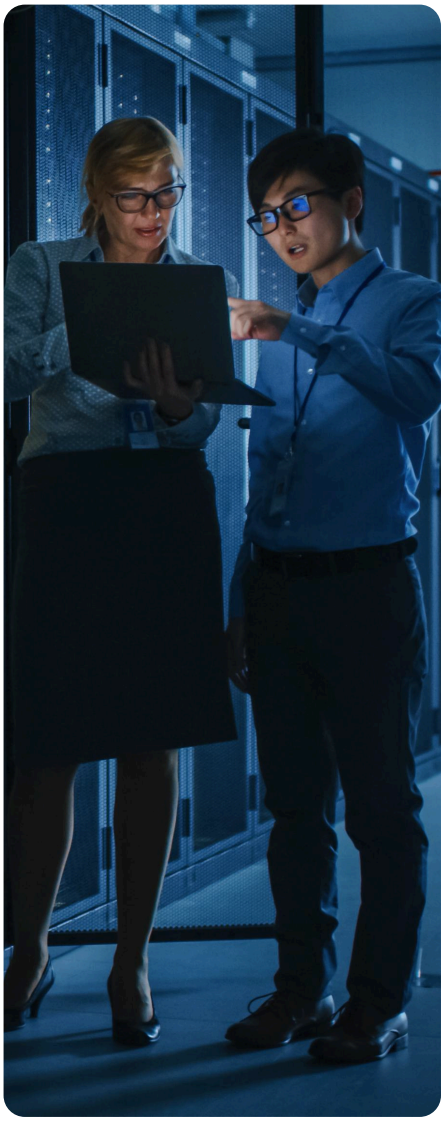

ONLY 15% could recover data without third-party backup

Salesforce Does Not Offer Point-in-time Recovery

The data recovery process takes a minimum of 6-8 weeks to complete, and we cannot guarantee 100% data recovery.

salesforce

Backup Means No More Data Loss

Backup SaaS data or risk losing customers, partners, and employees.

Gartner

Backups are critical in ransomware recovery and response, if you are infected, a backup may be the best way to recover your critical data.

CISA

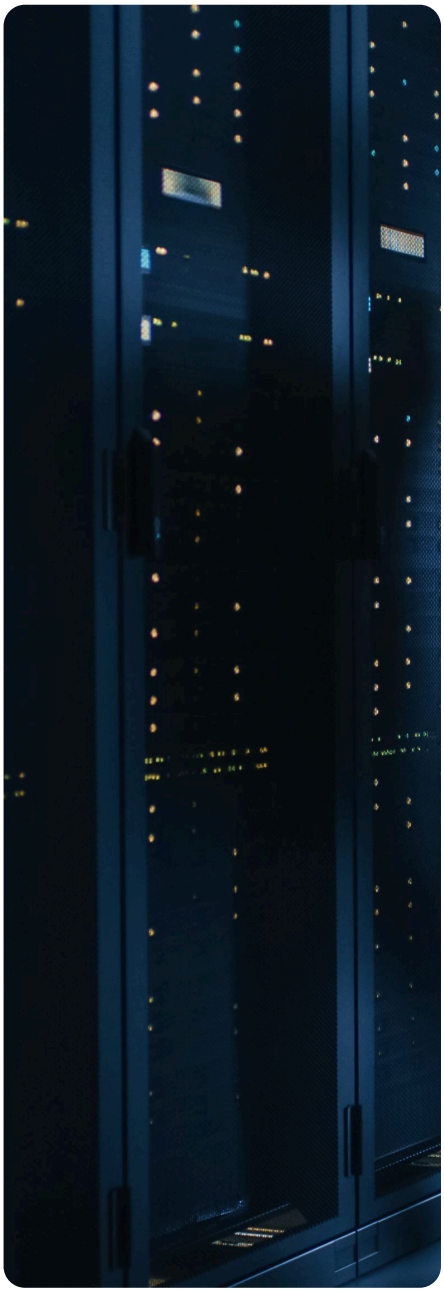

Regulations Mandate Backup

The controller should have the ability to restore the availability and access to personal data in a timely manner in the event of a physical or technical incident.

GDPR

It's Your Responsibility!

The Shared Responsibility Model puts the onus of the data protection, backup, and recovery of your customer's data on you.

Easy Recovery from Ransomware and Data Loss

Mitigate the risk of ransomware and reduce the cost of downtime with quick data recovery. Encrypted and immutable SaaS backup with unlimited retention lowers your Recovery Time Objective and ensures seamless business continuity.

Native Workarounds are Time-bound and Cost-prohibitive

Native workarounds like Data Export, Data Loader, and Reports are archival and not built for data recovery. Restoring data is tedious and after the time limit, data is permanently deleted.

Salesforce's backup tool is a paid add-on that can be cost-prohibitive with retention limits.
